Special Note

We organized the recent training at I.T.I Women's Gurgaon. Where the trainees were women and since it is rural area participants were not aware of harmful effects of carbide, so the training was very successful in term of awareness and capacity building for the fruit ripening. The Girls were very excited to undergo the course and followed the material taught to them very diligently. They were keen to explore the cold chain sector about which they did not have any knowledge before undergoing this training. Their Principal and Faculties of the institute also applauded our efforts and encouraged the training. The college was also keen to have an incubation centre for Agribusiness in the college, where the girls can start with their entrepreneurial projects. They have also requested to conduct the same training for the other students as the batch size was 35 and other students are also very keen to undergo this training.

LIST OF REPRESENTATIVE OF RIPENING CHAMBER PARTICIPATED

S.NO	Name of the ripening Chamber and Address	Name of the Representative	Opinion on proposed place of training
1	M/s. Kailash Agro Pvt. Ltd	Mr. Rajesh Katoch General Manager- Project Kailash Agro Pvt. Ltd.	Bhagola, Tatarpur Road Palwal, Haryana

FEEDBACK FROM UNIVERSITY

Ms. Poonam Sangwan, Principal Industrial Training Institute (ITI women) Gurgaon, Haryana was contacted by the organizers and Ms. Poonam Sangwan, Principal Industrial Training Institute (ITI women) Gurgaon, Haryana along with other important faculty were invited to inaugurate the training program. The Principal and staff of the college were very enthusiastic about the program.

Ms. Poonam Sangwan, Principal Industrial Training Institute (ITI women) Gurgaon, Haryana Introduced the Organizers to the students and explained the students the importance of the naturally ripened fruits. She inspired the students to follow the details of the course and ask their doubts. He was very actively organizing skill development courses for the students.

Youth who undergo this training program would be able to handle the ripening chambers in scientific and systematic way. Moreover they themselves can successfully become potential entrepreneurs by talking up ripening chambers as agriculture allied activity. Thereby they are able to create employment and also become job providers rather than job seekers.

The staff and students were happy to know about the financial assistance and the impetus available from the Government to build the interest in the Agriculture sector of the country. They applauded the efforts of NCCD for organizing such trainings all across the country.

FEEDBACK FROM TRAINEES

The participants expressed happiness about the training program and found it very useful. The participants felt that the information given by experts and faculty was a great learning experience. The participants were unaware about the fact that the best looking fruits in the market are ripened by Carbide.

They were very happy to visit Kailash Agro Pvt. Ltd. as they got the chance to see the ripening process live. They had a great learning experience when the staff of Kailash Agro Pvt. Ltd. explained them the entire procedures followed at Kailash Agro Pvt. Ltd. The officials showed them around the whole unit of Kailash Agro Pvt. Ltd. showing them the Sorting grading lines, machinery and controls, ripening chambers. The trainees found the entire information shared very informative and some of them wrote in their feedback that they will use the information in their near future.

The participants appreciated the contents of Dockets printed by the organizers for giving publicity to the training program. A summary of the harmful effects of carbide ripened fruits, aspects of ethylene ripening and schedule of training were given in the Dockets.

The training program is practical hands on experience and very helpful in understanding the operations of ripening chamber and how the Government is actively available to support the cause. The efforts made by NCCD in organizing the program at Industrial Training Institute (ITI women) Gurgaon, Haryana were appreciated by all. Ms. Poonam Sangwan, Principal Industrial Training Institute (ITI women) Gurgaon, Haryana was also thankful for the efforts put in for smooth conduct of the program.

FEEDBACK FROM FACULTY

- The faculty was very keen to spread awareness about the harmful effects of carbide and encourage people to use natural ripening.
- They appreciated the efforts of the government and NCCD.
- They thanked NCCD and ICE for organizing the visit to M/s Kailash Agro Pvt. Ltd. which was an excellent learning experience for the students as well as the faculty.
- They wanted the training to have a mention about the proven ways of identifying carbide ripened fruits.
- They want to have this type of training program every year in their campus.

PRESS NOTE

Capacity Building Initiative for Carbide free fruit ripening

Industrial Training Institute (ITI women) Gurgaon, Haryana: As per the agenda of the Hon'ble Prime Minister of India, Mr Narendra Modi, Agriculture is the driving force of the economy. The government is laying special emphasis on development of the agriculture sector and encouraging the citizens to come up with projects and businesses to support this sector. The Ministry of Agriculture has introduced a Two Day training program on "Entrepreneurial Opportunities in Agriculture Sector with focus on Fruit Ripening" throughout the country. The course will be offered by Ministry of Agriculture, Government of India (Carried out by National Centre for Cold Chain development (NCCD)-the nodal government of India body for cold chain along with ICE Centre of Excellence).

The training is aimed at imparting education and awareness regarding the modern methods of Fruit Ripening, hazards of Carbide Ripened fruits and the support available from the government to set up fruit ripening chambers.

The workshop was successfully conducted in Industrial Training Institute (ITI women) Gurgaon, Haryana, on 7th & 8th April 2015 in collaboration with Industrial Training Institute (ITI women) Gurgaon, Haryana. The workshop was attended by the students, Faculties and the entrepreneurs and was a great learning experience for all.

PREPARATION FOR THE SESSIONS:

After receiving the approvals for conducting trainings from National Centre for Cold Chain Development (NCCD), we contacted Industrial Training Institute (ITI women) Gurgaon, Haryana to give wide publicity about the training program to the students.

The existing ripening units in Palwal were requested to allow for the field visit and were also requested to share their entrepreneurial journey with the trainees. Mr. Rajesh Katoch, General Manager of the ripening units respectively Co-ordinate effectively with the organizers to ensure participation by all concerned in the industry.

The related companies, agriculture universities and bank representatives were contacted for the lectures to be given during the training. The faculty and staff of Industrial Training Institute (ITI women) Gurgaon, Haryana were also very enthusiastic to participate in the training program.

AGENDA: GENERATION OF EMPLOYMENT AND ENTREPREURIAL OPPORTUNITIES; AWARENESS ABOUT HARMFUL EFFECTS OF CARBIDE

The objective of the program was to:

- Train Human resources in banana ripening technology
- Educate the trainees about the harmful effects of Carbide ripened fruits
- Educate the trainees in real time conditions to give them hands o experience
- Promotion of standards, scientific procedures and best practices in banana ripening.
- Assist in providing employment opportunities to the trained candidates through our existing network of promoters of banana ripening chambers.
- Educate the potential entrepreneurs about
 - The financial viability of setting up a Banana ripening chamber.
 - The Technical standards on Banana Ripening established by Ministry of Agriculture.
 - New MIDH guidelines and financial assistance available
 - Financial assistance available from Indian Banks
- Provide feedback concerning future training needs, and participate in the design of annual training activities.

The prospective employers ie: ripening chamber owners allowed practical trainings in their facility and actively participated with the trainees, and clears the doubts of trainees during the practical session. The trainees were management graduates who were made aware about the benefits of entering the field of agriculture.

Many of them had traditional farms in their native places. They have been registered in our database and will be in touch for the preparation of DPRs etc.

Actual employment generated will be monitored and reported to the NCCD
